DETAILED ACTION

Claim Objections

1. Claims 3, and 15 are objected to because of the following informalities: In claim 3, line 2, delete the colon (:) after "wherein", in claims 10 and 11, line 7, "a metal powder" should be changed to --the metal powder-- if it is the metal powder defined in line 6; in claim 15, lines 1 and 2, the recitation "any of Claims 1-5" should be changed to --any of Claims 1-3—because the claims 4 and 5 have been canceled; in claims 19, line 3, "a metal member" should be changed to --the metal member-- if it is the metal member defined in line 2. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 9-12, 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Soe et al (US patent 6,285,284), newly cited.

Soe et al disclose, in figures 5 and 6, a RFID system comprising a soft magnetic member (56A,56B) disposed on a surface of an article 11, an antenna coil 58 and a conductive member 55 disposed on the soft magnetic member on an opposite side of a placement of the antenna coil. The patent to Soe et al also teaches that the soft magnetic member is compound of either metal powder or ferrite powder, wherein the

metal powder is an amorphous powder, see column 4, lines 8-55, and column 6, lines 4-61.

Allowable Subject Matter

4. Claims 13, 19, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 8, 14, 17, 18, and 21 are allowed.
